

A-MAN⁺ QD CLEAN

POWERED BY
QUANTUM DISINFECTION™
MADE IN USA

Bacteria

A-MAN CLEAN QD use
QUANTUM DISINFECTION™
technology to remove over
99.99% of bacteria

CAPACITY 200,000 GALLONS - INLET/OUTLET 1 INCH

A-Man CLEAN QD system is powered by Quantum Disinfection™, a cutting edge technology that protects your water from microbiological contaminants.

What is Quantum Disinfection™?

Parameter	Recommended Value
pH	3.5 - 8.5
Total Suspended Solids: TSS (mg/L)	< 5
Suspended Solid maximum size (µ)	< 5
Total Dissolved Solids: TDS (mg/L)	< 1,000
Turbidity (NTU)	< 0.01
Hardness (mg CaCO ₃ /L)	< 850
System Specifications	
Pressure	20-125 psi / 1.4-8.6 bar
Temperature	4.4 °C - 38 °C / 40 °F - 100 °F
Flow Rate: GPM (L/min)	12 GPM - 44.4 L/min

QUANTUM DISINFECTION™ Media: The surfaces of ceramic beads have been modified so that they have an instant disinfection capability. When microorganisms (bacteria, viruses, cyst, algae, yeasts, etc.) come into direct contact with those active ceramics, the electrons inside the pathogens are instantly attracted by the positively-charged surfaces. This causes the entire structure of the microorganism to collapse irreversibly.

NO POWER, NO CHEMICALS and NO MAINTENANCE are the main advantages of QUANTUM DISINFECTION™.

A-Man Clean QD is a product of Advanced Regenerative System (ARS) and powered by Quantum Disinfection™ that has undergone rigorous testing and certification standards relating performance against microbiological protection.
